

VA CAT II

# ISO 18436 Category II

## Intermediate Vibration Analyst Training & Certification

### Online Training

Learn vibration analysis from the world's leading provider of training & certification. At **Vibration Institute of Australia** we offer Mobius Institute online courses –the most understandable and interesting training available. Mobius Crystal Clear™ training methodology is unlike anything offered, using hundreds of 3D animations and software simulations that make complex concepts easier to understand. We offer ISO 18436 Category I to IV training via public venue courses as well as online through the Mobius Institute website.

Mobius Institute is ISO/IEC 17024 and ISO 18436–1 accredited, meaning that you are assured that your certification meets the highest global standards, and our training teaches you everything you need to know according to the ISO 18436 standard for vibration analyst training. There is no more highly regarded training & certification available.

# CAT-II Course **Overview**

The CAT-II course is intended for people who have mastered the basics but who need to be able to take good data (and decide how the data collector should be set up), analyze a range of fault conditions, and understand balancing and alignment.

We teach you to test machines correctly, how to diagnose faults accurately, perform additional diagnostic tests for verification, how to set vibration alarm limits, and how to correct certain types of faults. You need to understand what your analyzer settings mean so that you can take the best measurements. You also need to understand why the vibration signatures change the way they do and how to use time waveform analysis and phase analysis to verify the fault condition.

Mobius makes learning about vibration analysis unique. We use 3D animations, Flash simulations, and numerous software simulators that completely demystify vibration analysis. While vibration training courses have traditionally been very theoretical, difficult to understand, (and boring), you will be captivated by the Mobius Training methods, and you will enjoy our practical approach. You will take away skills that you can immediately apply to your job, and you will truly understand what you are doing.

You will come away from the course with a solid understanding of:

- How a well-designed program and a reliability centered maintenance approach improve the OEE and therefore the bottom line
- The condition monitoring technologies: acoustic emission, infrared analysis (thermography), oil analysis, wear particle analysis, & motor testing via supplementary training
- How machines work; via supplementary self-study using the "Equipment Knowledge" section
- How to select the correct measurement location and axis, and collect good, repeatable measurements
- What the Fmax, resolution, averaging and other analyzer settings mean, and how to select the optimum settings for a wide variety of machine types
- How to analyze vibration spectra, time waveforms, envelope (demodulation), and phase measurements
- How to diagnose: unbalance, eccentricity, misalignment, bent shaft, cocked bearing, looseness, rolling element bearings faults, journal bearing faults, gearbox faults, resonance, and other conditions
- How to set alarm limits manually and with statistics
- How to balance and align a machine, and correct a resonance condition

# CAT-II Course **Description**

**Duration:** 38 hours of training

**Format:** Online learning via the web

**Optional:** Certification examination, 70% passing grade

**Compliance:** ISO 18436 Category II - Vibration Analyst

**Online Learning:** Registered students are given access to the Mobius Institute Learning Management System for a period of 6 months to provide ample time to learn the material and prepare for the optional certification examination

**Optional:** Online tutoring with VIA's Clyde Volpe.

**Certification Prerequisite:** Prior experience is not required for attending the training course, but 18 months of experience is required for certification.

## **Category II - Candidate Profile:**

- You have a good understanding of the vibration fundamentals
- You want to be capable of confidently diagnosing a wide range of fault conditions, correcting certain conditions, and taking accurate measurements
- You look forward to the opportunity to develop your skills in the field of machine condition & vibration analysis
- You are seeking to become certified to international standards (ISO-18436) by an accredited certification body
- You want to become a key member of your condition monitoring team

**Outcome:** You will come away from this course with a very good understanding of vibration analysis fundamentals, and you will be competent in quality data acquisition and diagnosing common machine faults.

## Topics covered:

- Review of maintenance practices
- Review of condition monitoring technologies
- Principles of vibration; Review of basics, waveform, spectrum (FFT), phase and orbits
- Understanding signals: modulation, beating, sum/difference
- Data acquisition
- Signal processing
- Vibration spectrum analysis
- An introduction to time waveform analysis
- An introduction to orbit analysis
- Phase analysis: bubble diagrams and ODS
- Enveloping (demodulation), shock pulse, spike energy, PeakVue™
- Fault analysis
- Equipment testing and diagnostics including impact testing (bump tests) and phase analysis
- Corrective action
- Running a successful condition monitoring program
- Acceptance testing
- Review of ISO standards

The BEST Analysts are VIA & MOBIUS Trained™

The purchase of the **online learning course** includes six months access to the Mobius Learning Management System (LMS) where you are provided the complete course content, carefully explained and demonstrated on-screen.

Other options available for purchase to support your online learning are:

- hard copy training materials
- online tutoring with VIA's Clyde Volpe
- become certified by taking the optional certification examination through invigilation.

## CAT-II Certification

All Mobius certified analysts receive personalized logos with their certification number and name for their own professional use. Mobius Institute also maintains a listing of all certified analysts on our website and provides each analyst with a certification confirmation webpage.

For more information about Mobius Institute's accreditation, and the recognition of your certification by the ISO 18436 standard, please visit [www.mobiusinstitute.com/certification](http://www.mobiusinstitute.com/certification).
