

Vibration Analysis: ISO Category 2

Vibration Analysis ISO Category 2

The 'Intermediate Level' **Mobius Institute** Category 2 course is ideal for those who are interested in condition monitoring to ensure the reliability of their machinery, and who have either, completed a VA Cat 1, or have significant vibration analysis experience, including an understanding of vibration theory and terminology.

The course provides an in-depth study of machinery faults and their associated spectrum, time waveform and phase characteristics. Additional topics covered include: signal process; signal analysis data collection; and proactive measures. You will come away with a very good understanding of the fundamentals and you will feel comfortable analyzing vibration spectra, time waveforms, envelope data, and phase data.

Course Materials

- Pre and post course online study resources
- Interactive assessments during the course
- 300-page course notes
- Short-form booklet
- Diagnostic mousepad
- VIA Certificate of Completion
- Mobius Certificate
- Mobius membership

Public Course Description

Duration: 5 days training including optional 3-hour Certification exam

Hours: Training Days 1-5: 8.00am to 5.00pm

Exam Day 5: 1 pm to 4.00pm

Format: Classroom learning

Optional: Certification examination, 3 hours, 70% passing grade

Compliance: Follows ISO 18436-2 and 18436-3 and provides 3.5 Continuing Education Unit CEU credits

Pre-Study: Registered students are given access to the online version of the course via the **Mobius Institute Learning Zone™** before the class and for six months after course completion to assist them with converting the course information into practice.

Certification Prerequisite: Prior experience is not required for attending the training course, but 18 months of experience is required for certification.

Outcome: You will come away from this course with a very good understanding of vibration analysis fundamentals, you will be competent in quality data acquisition and diagnosing common faults.

Vibration Analysis Category 2 – Certification

All VIA trained, **Mobius Institute™** certified analysts receive personalized logos with their certification number and name for their own professional use. Mobius Institute also maintains a listing of all certified analysts on our website and provides each analyst with a certification confirmation webpage.

For more information about Mobius Institute's accreditation, and the recognition of your certification by the ISO 18436 standard, please visit www.mobiusinstitute.com/certification.

Vibration Analysis: ISO Category 2

Course Summary

Review of maintenance practices

Review of condition monitoring technologies

Principles of vibration

- Complete review of basics
- Waveform and spectrum (FFT), phase and orbits
- Understanding signals

Data acquisition

- Transducers types, selection and mounting
- Measurement point selection
- Following routes, test planning, measurement errors

Signal processing

- Filters, sampling, aliasing, dynamic range, windowing
- Resolution, Fmax, data collection time, averaging

Vibration analysis

- Spectrum analysis methodology
- Introduction to time waveform, phase and orbit analysis
- Enveloping, shock pulse, spike energy, Peak Vue™

Detailed fault analysis

- Natural frequencies and resonances
- Imbalance, eccentricity and bent shaft
- Misalignment, cocked bearing and soft foot
- Mechanical looseness
- Rolling element bearing analysis
- Analysis of induction motors, gears, belts, pumps, compressors, and fans
- Lots of case studies and exercises for participants

Equipment testing and diagnostics

- Impact testing (bump tests)
- Phase analysis

Corrective action

- General maintenance repair activities
- Review of the balancing and shaft alignment process

Successful condition monitoring program

- Setting baselines and alarm limits
- Report generation, reporting success stories

Acceptance testing and ISO standards

Public Course Includes

Course (& Materials)

- 4.5 day classroom training
- Pre and post course online study resources
- Diagnostic Reference Guide
- Course Notes/ Manual
- Certificate of Completion
- Lunches and refreshments included

Optional Exam - 3 hour Certification exam

Registration

Visit viaustralia.com.au/registration to register or to request a quote for our courses.

- tailored in-house training
- Mobius distance learning online courses
- public classroom courses

About VIA

Clyde Volpe is the founder of VIA - the Vibration Institute of Australia, and is the **exclusive Mobius™ Training Partner** for Category 1, 2, and 3 Vibration Analysis public courses in the Australia/New Zealand region.

Mobius Institute awarded Clyde 'Instructor of the Century'. He has trained in over 30 countries, spanning 30 years to over 12,000 students. Clyde has a reputation for his energy, and his motivating and entertaining courses. With his hands-on experience, with the Mobius simulators, he has the ability of making the very complex easy to understand. His courses are designed to use vibration analysis to drive capability.
